### **The Barrier Groups' Barrier1™ New Generation UTM or Intelligent Threat Management (ITM) Appliance**

*ITM - Listen, Learn, Predict and React = Effectiveness*

**MINNEAPOLIS, MN – July 19, 2006** – The Barrier Group announces another major breakthrough in network security. A revolutionary reporting module name BarrierView. This new product can stand alone or be installed as an attachment to The Barrier Group's Barrier1 security appliance.

The product is platform neutral generating reports in real time providing the IT Manager the ability to completely customize and automate the reporting process. BarrierView allows the user the ability to use the reporting module for 700 different log formats. Additionally the product has extensive drill down capacity that assist the IT Manager in trouble shooting as well as providing a clear and easily managed audit trail for compliance requirements.

BarrierView is so flexible that it can be used to monitor and report on not only security systems but virtually every appliance in the IT network. In short it is a reporting tool of vast abilities, flexibility and applications.

“BarrierView is a fraction of the price of other more limited reporting products available in the marketplace. We have customers who will speak to the product as it is in full production and installed at customer sites,” said Steve Sahl, Chief Executive Officer of The Barrier Group.

The BarrierView reporting product is available directly through The Barrier Group. For more information, contact The Barrier Group toll-free at 877-230-6789, or email [sales@thebarriergroup.com](mailto:sales@thebarriergroup.com).

#### ***About The Barrier Group:***
